UI/UX   SEO   Accessibility (a11y)   Internationalization (i18n)

Azure DevOps   Github Actions   Gitlab CI

Scrum   Agile   Git

Strengths

⪻ Collaborative

I am always keen to share knowledge, help, discuss, teach and learn from others. I am able to collaborate with cross-functional teams to create a high-quality end product.

★ Result-oriented

Many confuse progress with moving in the right direction. I always make sure to check if the team is on the right path.

✎ Detail-oriented

Continuously focused on how to improve my work and do it the best way I can.

🕐 Project management and prioritization

I am always making sure that project deadlines are met and the required results are delivered on time.

More

I am an open-source software maintainer. My open-source projects are available on NPM. They have been downloaded more than a million times and can be seen on my Github profile.

I have published several articles including guides on how to use Cypress to test authenticated Websockets, how to run multiple Webpack-based applications simultaneously, and how to put a watermark on multiple images using NodeJS. All of my articles and blog posts are available on my personal website.
